EDUCATION

D. J. Sanghvi College of Engineering, B.Tech in Computer Science and Engineering (Data Science)
SGPA: 9.70 (till Sem 6)

2023 – Present | Mumbai, India

PROFESSIONAL EXPERIENCE

Frappe Technologies, Software Engineer Apprentice

06/2026 – Present | Mumbai, India

- Undergoing hands-on training in the **Frappe Framework and ERPNext**, learning full-stack development, framework architecture, and enterprise ERP workflows.
- Working with **Python, JavaScript, Redis, and Docker** to understand scalable backend services and business application development.
- Gaining exposure to enterprise software development practices, including debugging, testing, and deployment in a production-grade environment.

Digikendr, AI & Software Development Intern

10/2025 – 02/2026 | Mumbai, India

- Developed AI-powered software solutions using **MongoDB, Firebase, Gemini, and OpenAI APIs**, deploying scalable services on **AWS EC2** with image storage on **Amazon S3** along with storing secrets in **AWS Secrets Manager**. Gained hands-on experience in **model optimization, production deployment, and integrating AI systems into real-world business pipelines**.
- Built an end-to-end **Meta Ads optimization pipeline** featuring web scraping (Shopify & e-commerce stores), automated ad copy generation (LLM-based), and performance analytics.
- Implemented AI-driven targeting and creative optimization workflows, improving **conversion rates by ~20–35%** and increasing overall campaign revenue.

PROJECTS

StudyStack – AI-Powered Student Financing & Engagement Platform 🏆 ,
2nd Runner-Up – Poonawalla TenzorX National Hackathon 2026 (Top 3 of 27,000+ teams)

- Built a full-stack AI platform that streamlines student counselling, university discovery, and education loan workflows using **Next.js, MongoDB, and Gemini**. Designed an **AI-powered loan intelligence module** providing eligibility estimation, personalized loan recommendations, and ROI/EMI analysis.
- Developed a **voice-based AI counselling system** with persistent conversation memory to automate profile extraction and personalized guidance.
- Implemented an **agentic workflow engine** for automated campaign generation, multi-channel outreach, and lead management across email, WhatsApp, and social platforms.
- Architected a **dual-pass RAG policy engine** that ingests education loan policies from bank PDFs, extracts structured eligibility rules, and validates LLM outputs through an independent **faithfulness verification** pipeline.
- Engineered secure authentication, role-based dashboards, and scalable REST APIs supporting students and counsellors.

Tech Stack: Next.js, React, TypeScript, MongoDB, Gemini API, ElevenLabs, Exa web search, NextAuth, Tailwind CSS

OneFlow 🏆 , Enterprise Project Management ERP System

- Built a **full-stack ERP platform** using **Next.js, PostgreSQL, and Prisma** to manage projects, tasks, timesheets, and financial workflows (sales orders, invoices, purchase orders).
- Designed a **relational database (20+ models)** and implemented secure authentication using **NextAuth, JWT sessions, and role-based access control (RBAC)**.
- Developed CI/CD pipelines with **GitHub Actions** and optimized Docker builds for efficient deployment.
- Deployed on **Google Cloud Run with serverless auto-scaling** and zero-downtime releases.
- Tech Stack: Next.js, PostgreSQL, Prisma, NextAuth, TypeScript, Docker, GitHub Actions, Google Cloud Run

ChainForecast CRM 🏆 , Agentic AI-powered sales forecasting and blockchain-backed auditability.

- Built an **agentic AI platform** where **Gemini-powered agents convert natural-language campaign briefs into executable multi-agent workflows** for strategy, research, copy, creatives, and distribution.
- Implemented a **dependency-aware multi-agent execution engine** enabling automated **content generation, email campaigns, and social media publishing** with persistent workflow state in MongoDB.
- Developed an **AI sales forecasting system using Random Forest (200 trees)** producing **28-day demand forecasts with <5% MAE** on large retail time-series datasets.
- Designed **customer intelligence pipelines using RFM analysis and K-Means clustering** to segment users into **VIP, Regular, and At-Risk groups** for targeted marketing.
- Integrated **Ethereum + Merkle Trees** to create **tamper-proof verification and audit trails for AI predictions and workflows**.

Tech Stack: Python, FastAPI, Scikit-learn, Gemini API, MongoDB Atlas, React, Next.js, TypeScript, Ethereum (Solidity, Web3.py), Docker, CI/CD (GitHub Actions, Vercel).

SKILLS

Programming Languages — Python, C++, Java, C, SQL | **Core Concepts** — DSA, OOPs, DBMS, OS | **Web Development** — HTML5, CSS3, JavaScript, React.js, Redux toolkit, Express.js, Node.js, MongoDB, Redis, Next.js, FastAPI, Flask, Jinja2 | **ML & Data Science** — Scikit-learn, TensorFlow, Deep Learning, NLP, BERT, Ollama Studio, Transformers, LangChain, LangGraph | **Cloud & Deployment** — GCP, AWS, Docker, Ansible, Jenkins, Kubernetes, Nginx, Terraform, GitHub actions, GitLab, CI/CD pipelines

AWARDS

Poonawalla TenzorX National AI Hackathon 2026 – 2nd Runner-Up (Top 3 of 27,000+ teams), ₹1 Lakh Prize, organised by Poonawalla Fincorp

National Level Hackathon Winner - SPIT Hackathon '26 (1000+ teams), organized by CSI Sardar Patel Institute of Technology

Hackathon Winner - Code It Ralph, organized by CSI Sardar Patel Institute of Technology

Hackathon Winner - Techvanza '26, organized by Usha Pravin Gandhi College

National Healthcare Ideathon Winner, Enactus KJSCE
